

GROUNDING IN SCIENCE FOR GENERATIONS TO COME

Katana screw piles are a more **DURABLE** and **ECO-FRIENDLY** method of constructing a structural foundation than traditional concrete bored piers.

✓ 100% AUSTRALIAN
MADE USING HIGH
GRADE TENSILE STEEL

✓ STRONGER FOUNDATION
BY TRANSFERRING
STRUCTURAL LOADS
TO FIRM STRATUM

✓ DESIGNED FOR
SLAB ON GROUND
AND RAISED FLOOR
SYSTEMS

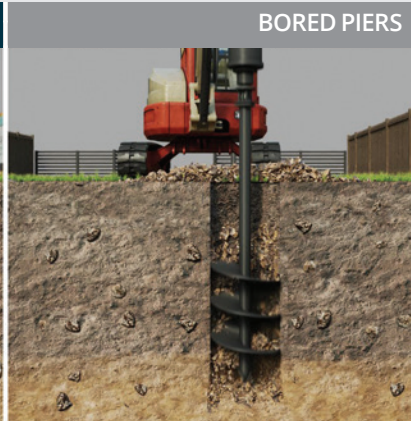

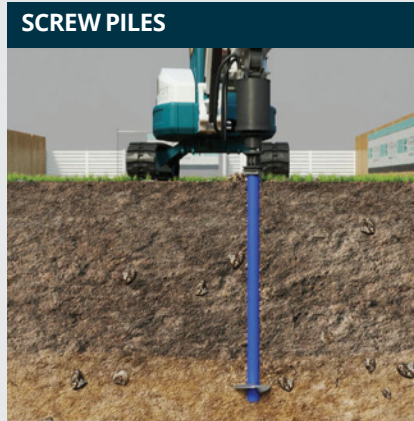

✓ CODEMARK
QUALITY
CERTIFIED

WHY WE USE SCREW PILES

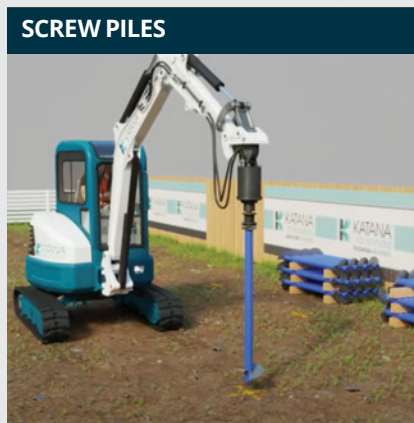

SCREW PILES WORK WITH THE EARTH – NOT AGAINST IT.

Screw piles are less susceptible to damage caused by movement of the soil.

FAST AND EASY INSTALLATION.

Avoid costly delays due to inclement weather.

ECO - FRIENDLY WITH NO SPOIL TO REMOVE.

A typical home using concrete bored piers generates 30m³ of spoil. That's five skip bins!
